

get

```
graph LR; A[get] --> B["doris::vectorized::  
ColumnComplexType::get_data"]
```

The diagram illustrates a function call resolution. A small grey box on the left contains the text 'get'. A blue arrow points from this box to a larger white box on the right. The white box contains two lines of text: 'doris::vectorized::' and 'ColumnComplexType::get_data'. The entire diagram is set against a plain white background.

doris::vectorized::
ColumnComplexType::get_data
