

doris::vectorized::
VMysqlResultWriter::init

doris::vectorized::
VResultFileSink::prepare

return_object_data
_as_binary

```
graph LR; A["doris::vectorized::  
VMysqlResultWriter::init"] --> C["return_object_data  
_as_binary"]; B["doris::vectorized::  
VResultFileSink::prepare"] --> C;
```

The diagram consists of three rectangular boxes. On the left, there are two white boxes with black borders, stacked vertically. The top box contains the text 'doris::vectorized::VMysqlResultWriter::init' and the bottom box contains 'doris::vectorized::VResultFileSink::prepare'. On the right, there is a single gray box with a black border containing the text 'return_object_data' on the top line and '_as_binary' on the bottom line. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating a flow or relationship from the left-hand components to the right-hand component.
