

doris::vectorized::  
AggregateFunctionBitmapData::read

doris::vectorized::  
AggOrthBitMapIntersect::read

deserialize\_as\_stream

```
graph LR; A["doris::vectorized::  
AggregateFunctionBitmapData::read"] --> C["deserialize_as_stream"]; B["doris::vectorized::  
AggOrthBitMapIntersect::read"] --> C;
```

The diagram illustrates a mapping from two specific Doris vectorized read functions to a common deserialization routine. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'doris::vectorized::AggregateFunctionBitmapData::read'. The bottom box contains 'doris::vectorized::AggOrthBitMapIntersect::read'. On the right, there is a gray rectangular box with a black border containing the text 'deserialize\_as\_stream'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both read functions utilize the 'deserialize\_as\_stream' method.
