

doris::vectorized::  
LessOp::apply

doris::vectorized::  
FieldVisitorAccurateLess  
::operator()

lessOp

```
graph LR; A[doris::vectorized::LessOp::apply] --> C[lessOp]; B[doris::vectorized::FieldVisitorAccurateLess::operator()] --> C;
```

The diagram illustrates two different code paths that converge on a single target. On the left, there are two rectangular boxes. The top box contains the text 'doris::vectorized::LessOp::apply'. The bottom box contains the text 'doris::vectorized::FieldVisitorAccurateLess::operator()'. On the right, there is a gray rectangular box labeled 'lessOp'. Two blue arrows originate from the right side of the two boxes on the left and point towards the 'lessOp' box, indicating that both functions call or utilize the 'lessOp' component.
