

/Users/dabowang/be
_all/pipeline/exec/nested
_loop_join_probe_operator.h

```
graph BT; A["/Users/dabowang/be_all/pipeline/exec/nested_loop_join_probe_operator.h"] --> B["/Users/dabowang/be_all/pipeline/exec/nested_loop_join_probe_operator.cpp"]; A --> C["/Users/dabowang/be_all/pipeline/pipeline_fragment_context.cpp"];
```

The diagram illustrates a header file inclusion relationship. At the top, a grey box contains the header file path: /Users/dabowang/be_all/pipeline/exec/nested_loop_join_probe_operator.h. Below it, two white boxes represent source files. The left box contains /Users/dabowang/be_all/pipeline/exec/nested_loop_join_probe_operator.cpp, and the right box contains /Users/dabowang/be_all/pipeline/pipeline_fragment_context.cpp. Two blue arrows point from the bottom of each source file box up to the header file box, indicating that both source files include this header.
