

doris::TabletMeta::  
delete\_stale\_rs\_meta  
\_by\_version

doris::TabletMeta::  
modify\_rs\_metas

remove

```
graph LR; A["doris::TabletMeta::  
delete_stale_rs_meta  
_by_version"] --> C[remove]; B["doris::TabletMeta::  
modify_rs_metas"] --> C;
```

The diagram illustrates a flow where two distinct operations, 'delete\_stale\_rs\_meta\_by\_version' and 'modify\_rs\_metas', both lead to a common 'remove' action. The first operation is contained within a white box with a black border, while the second is in a similar box below it. The 'remove' action is represented by a gray box on the right. Blue arrows indicate the direction of the flow from each operation box to the 'remove' box.
