

DorisMetrics

\_update

\_update\_process\_thread\_num

```
graph LR; A[DorisMetrics] --> B[_update]; B --> C[_update_process_thread_num];
```

The diagram illustrates a sequence of three components connected by arrows. The first component, 'DorisMetrics', is in a white box. An arrow points from it to the second component, '\_update', also in a white box. A second arrow points from '\_update' to the third component, '\_update\_process\_thread\_num', which is in a gray box. This suggests a flow of data or a sequence of operations.
