internalSetVal

```
graph LR; A["doris::JsonbBinaryVal::setVal"] --> C["internalSetVal"]; B["doris::JsonbStringVal::setVal"] --> C;
```

The diagram illustrates a common internal method for setting JSONB values. On the left, two boxes represent specific Doris JSONB types: `doris::JsonbBinaryVal::setVal` (top) and `doris::JsonbStringVal::setVal` (bottom). Both boxes have a blue arrow pointing to a single gray box on the right labeled `internalSetVal`, indicating that these public methods delegate the actual setting logic to this internal function.
