

```
greaterOp< doris::vectorized  
::UInt128, doris::vectorized  
::Float64 >
```

```
graph LR; A[greaterOp< doris::vectorized<br/>::UInt128, doris::vectorized<br/>::Float64 >] --> B[greaterOp]; B --> C[greaterOpTmpl]
```

The diagram illustrates a sequence of three components connected by blue arrows. The first component is a gray box containing a C++ function signature: `greaterOp< doris::vectorized::UInt128, doris::vectorized::Float64 >`. A blue arrow points from this box to a white box labeled `greaterOp`. Another blue arrow points from the `greaterOp` box to a final white box labeled `greaterOpTmpl`.

`greaterOp`

`greaterOpTmpl`
