/schema_backends_scanner.h

```
graph BT; A["/Users/dabowang/be_all/exec/schema_scanner.cpp"] --> C["/Users/dabowang/be_all/exec/schema_scanner/schemas_backends_scanner.h"]; B["/Users/dabowang/be_all/exec/schema_scanner/schemas_backends_scanner.cpp"] --> C;
```

The diagram illustrates a file dependency structure. At the top is a gray box representing a header file: `/Users/dabowang/be_all/exec/schema_scanner/schemas_backends_scanner.h`. Below it are two white boxes representing source files. The left box is `/Users/dabowang/be_all/exec/schema_scanner.cpp` and the right box is `/Users/dabowang/be_all/exec/schema_scanner/schemas_backends_scanner.cpp`. Blue arrows point from each source file box up to the header file box, indicating that both source files include the header file.
