get_data

```
graph LR; A["doris::segment_v2:: BinaryDictPageDecoder ::next_batch"] --> D["get_data"]; B["doris::segment_v2:: BinaryDictPageDecoder ::read_by_rowids"] --> D;
```

The diagram illustrates a control flow where two different methods of a `BinaryDictPageDecoder` class (one for `next_batch` and one for `read_by_rowids`) both lead to a common `get_data` function. The source functions are in white boxes, and the target function is in a grey box. Blue arrows indicate the direction of the flow.
