

doris::NgramTokenExtractor  
::next\_in\_string

doris::NgramTokenExtractor  
::next\_in\_string\_like

get\_utf8\_byte\_length

```
graph LR; A[doris::NgramTokenExtractor::next_in_string] --> C[get_utf8_byte_length]; B[doris::NgramTokenExtractor::next_in_string_like] --> C;
```

The diagram illustrates a dependency or call relationship. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'doris::NgramTokenExtractor::next\_in\_string' and the bottom box contains 'doris::NgramTokenExtractor::next\_in\_string\_like'. On the right, there is a single gray rectangular box with the text 'get\_utf8\_byte\_length'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both functions on the left call or depend on the 'get\_utf8\_byte\_length' function on the right.
