

doris::vectorized::
FunctionIn::execute_impl

doris::vectorized::
FunctionIn::prepare

get_arg_type

```
graph LR; A["doris::vectorized::FunctionIn::execute_impl"] --> C["get_arg_type"]; B["doris::vectorized::FunctionIn::prepare"] --> C;
```

The diagram illustrates two function calls to a common target. On the left, there are two white rectangular boxes. The top box contains the text 'doris::vectorized::FunctionIn::execute_impl' and the bottom box contains 'doris::vectorized::FunctionIn::prepare'. On the right, there is a gray rectangular box containing the text 'get_arg_type'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both functions call 'get_arg_type'.
