

doris::EvHttpServer
::_find_handler

doris::WebPageHandler
::_handle

raw_path

```
graph LR; A["doris::EvHttpServer  
::_find_handler"] --> C["raw_path"]; B["doris::WebPageHandler  
::_handle"] --> C;
```

The diagram illustrates a flow where two different functions, `doris::EvHttpServer::_find_handler` and `doris::WebPageHandler::_handle`, both point to a common variable named `raw_path`. The functions are represented in white boxes with black borders, while the variable is in a gray box. Blue arrows indicate the direction of the flow from the functions to the variable.
