

```
doris::vectorized::  
VUnionIterator::current  
_block_row_locations
```

The diagram consists of two rectangular boxes connected by a blue arrow. The left box is white with a black border and contains the C++ code snippet. The right box is gray with a black border and contains the variable name. A blue arrow points from the right side of the left box to the left side of the right box, indicating that the member variable points to the memory location of the variable.
