doris::vectorized::
FunctionComparison::
execute_impl

is_numeric

```
graph LR; A[doris::vectorized::FunctionArraysOverlap::execute_impl] --> C[is_numeric]; B[doris::vectorized::FunctionComparison::execute_impl] --> C;
```

The diagram illustrates two separate function calls, each represented in a white box with a black border, pointing via blue arrows to a single gray box on the right. The top box contains the text 'doris::vectorized::FunctionArraysOverlap::execute_impl'. The bottom box contains the text 'doris::vectorized::FunctionComparison::execute_impl'. Both boxes have arrows pointing towards a gray box labeled 'is_numeric'.
