

```
greaterOp< doris::vectorized  
::UInt64, doris::vectorized  
::Float32 >
```

```
graph LR; A["greaterOp< doris::vectorized<br>::UInt64, doris::vectorized<br>::Float32 >"] --> B[greaterOp]; B --> C[greaterOpTmpl]
```

The diagram illustrates a sequence of three boxes connected by blue arrows. The first box, which has a gray background, contains the C++ template specialization `greaterOp< doris::vectorized::UInt64, doris::vectorized::Float32 >`. A blue arrow points from this box to a second, white box containing the text `greaterOp`. Another blue arrow points from the second box to a third, white box containing the text `greaterOpTmpl`.

`greaterOp`

`greaterOpTmpl`
