

doris::vectorized::
FunctionArrayEnumerate
::execute_impl

doris::vectorized::
FunctionArrayEnumerateUniq
::execute_impl

clone_resized

```
graph LR; A[doris::vectorized::FunctionArrayEnumerate::execute_impl] --> C[clone_resized]; B[doris::vectorized::FunctionArrayEnumerateUniq::execute_impl] --> C;
```

The diagram illustrates two distinct function pointers, each represented by a white box with a black border, pointing via blue arrows to a single target represented by a gray box. The top pointer is for `doris::vectorized::FunctionArrayEnumerate::execute_impl`, and the bottom pointer is for `doris::vectorized::FunctionArrayEnumerateUniq::execute_impl`. Both arrows converge on the `clone_resized` target.
