_actions.h

```
graph BT; A["/Users/dabowang/doris  
/be/src/http/action/pprof  
_actions.h"] --> B["/Users/dabowang/doris  
/be/src/http/action/pprof  
_actions.cpp"]; A --> C["/Users/dabowang/doris  
/be/src/service/http  
_service.cpp"];
```

The diagram illustrates a file dependency structure. At the top is a header file box (shaded gray) containing the path `/Users/dabowang/doris/be/src/http/action/pprof_actions.h`. Below it are two source file boxes (white with black borders). The left box contains `/Users/dabowang/doris/be/src/http/action/pprof_actions.cpp` and the right box contains `/Users/dabowang/doris/be/src/service/http_service.cpp`. Two blue arrows point from the bottom of each source file box up to the header file box, indicating that both source files include the header file.
