

autodigit\_less::operator()

autodigit\_greater::  
operator()

AutoDigitLessThan

```
graph LR; A[autodigit_less::operator()] --> C[AutoDigitLessThan]; B[autodigit_greater::operator()] --> C;
```

The diagram illustrates two function pointers, `autodigit_less::operator()` and `autodigit_greater::operator()`, both pointing to the `AutoDigitLessThan` class. The arrows indicate that these functions are associated with or point to the class.
