

get\_fractional\_part

get\_whole\_part

get\_scale\_multiplier

```
graph LR; A[get_fractional_part] --> C[get_scale_multiplier]; B[get_whole_part] --> C;
```

The diagram illustrates a flow where two separate components, 'get\_fractional\_part' and 'get\_whole\_part', both contribute to a single target component, 'get\_scale\_multiplier'. This is represented by two blue arrows originating from the left boxes and pointing towards the right box.
