

doris::Tablet::build
_tablet_report_info

doris::Tablet::cooldown

replica_id

```
graph LR; A[doris::Tablet::build_tablet_report_info] --> C[replica_id]; B[doris::Tablet::cooldown] --> C;
```

The diagram illustrates a dependency or data flow. Two white rectangular boxes on the left represent functions: 'doris::Tablet::build_tablet_report_info' (top) and 'doris::Tablet::cooldown' (bottom). Two blue arrows originate from the right side of these boxes and point towards a gray rectangular box on the right labeled 'replica_id'. This indicates that both functions interact with or depend on the 'replica_id' variable.
