/function\_string\_to\_string.h

```
graph BT; A["/Users/dabowang/doris<br>/be/src/vec/functions<br>/function_string.cpp"] --> C["/Users/dabowang/doris<br>/be/src/vec/functions<br>/function_string_to_string.h"]; B["/Users/dabowang/doris<br>/be/src/vec/functions<br>/url/function_url.cpp"] --> C;
```

The diagram illustrates a file dependency structure. At the top is a gray box representing a header file: /Users/dabowang/doris/be/src/vec/functions/function\_string\_to\_string.h. Below it are two white boxes representing source files. The left box is /Users/dabowang/doris/be/src/vec/functions/function\_string.cpp, and the right box is /Users/dabowang/doris/be/src/vec/functions/url/function\_url.cpp. Two blue arrows point from the bottom of each source file box up to the header file box, indicating that both source files include the header file.
