

set\_tablet\_state

```
graph LR; A[set_tablet_state] --> B[doris::Status::OK]; B --> C[doris::Status::Status];
```

The diagram illustrates a three-step process flow. It begins with a gray rectangular box labeled 'set\_tablet\_state'. A blue arrow points from this box to a white rectangular box labeled 'doris::Status::OK'. A second blue arrow points from the 'doris::Status::OK' box to a final white rectangular box labeled 'doris::Status::Status'. All boxes have a thin black border.

doris::Status::OK

doris::Status::Status
