

`_get_slot_column_id`

```
graph LR; A["_get_slot_column_id"] --> B["doris::vectorized::  
AggFnEvaluator::input  
_exprs_ctxs"]
```

The diagram illustrates a function call. On the left, a gray rectangular box contains the text `_get_slot_column_id`. A blue arrow points from this box to a larger white rectangular box on the right. The white box contains the text `doris::vectorized::`, `AggFnEvaluator::input`, and `_exprs_ctxs` on three separate lines.

`doris::vectorized::`
`AggFnEvaluator::input`
`_exprs_ctxs`
