::insert_result_into

get_argument_types

```
graph LR; A[doris::vectorized::AggregateFunctionRetention::add] --> D[get_argument_types]; B[doris::vectorized::AggregateFunctionWindowFunnel::add] --> D; C[doris::vectorized::AggregateFunctionRetention::insert_result_into] --> D;
```

The diagram illustrates a dependency or call relationship. Three source functions, each in a white box with a black border, have blue arrows pointing to a single target function in a gray box. The target function is 'get_argument_types'. The source functions are 'doris::vectorized::AggregateFunctionRetention::add', 'doris::vectorized::AggregateFunctionWindowFunnel::add', and 'doris::vectorized::AggregateFunctionRetention::insert_result_into'.
