shutdown

```
graph LR; A[doris::RecordBatchQueue::shutdown] --> C[shutdown]; B[doris::KafkaDataConsumerGroup::~~KafkaDataConsumerGroup] --> C;
```

The diagram illustrates a shutdown process. Two boxes on the left represent the components being shut down: 'doris::RecordBatchQueue::shutdown' and 'doris::KafkaDataConsumerGroup::~~KafkaDataConsumerGroup'. Blue arrows from both boxes point to a single gray box on the right labeled 'shutdown', indicating that both components trigger the shutdown process.
