

doris::PlainTextLineReader
::read_line

doris::NewPlainTextLineReader
::read_line

decompress

```
graph LR; A[doris::PlainTextLineReader::read_line] --> D[decompress]; B[doris::NewPlainTextLineReader::read_line] --> D;
```

The diagram illustrates a dependency or call relationship. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'doris::PlainTextLineReader' followed by '::read_line' on a new line. The bottom box contains the text 'doris::NewPlainTextLineReader' followed by '::read_line' on a new line. On the right, there is a gray rectangular box with a black border containing the text 'decompress'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both read_line methods utilize the decompress function.
