

doris::PathTrie::~~PathTrie

doris::PathTrie::TrieNode  
::~~TrieNode

deallocate

```
graph LR; A[doris::PathTrie::~~PathTrie] --> C[deallocate]; B[doris::PathTrie::TrieNode ::~TrieNode] --> C;
```

The diagram illustrates a memory management flow. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'doris::PathTrie::~~PathTrie'. The bottom box contains the text 'doris::PathTrie::TrieNode' followed by '::~~TrieNode' on a new line. Two blue arrows originate from the right side of these boxes. The arrow from the top box points to the top of a gray rectangular box on the right. The arrow from the bottom box points to the bottom of the same gray box. The gray box contains the text 'deallocate'.
