

```
doris::vectorized::  
VCollectIterator::Level1Iterator  
::current_row_location
```

```
graph LR; A["doris::vectorized::  
VCollectIterator::Level1Iterator  
::current_row_location"] --> B["current_row_location"]
```

The diagram illustrates a pointer relationship. On the left, a white rectangular box with a black border contains the C++ code snippet: `doris::vectorized::VCollectIterator::Level1Iterator::current_row_location`. A blue arrow points from the right side of this box to a gray rectangular box on the right. The gray box contains the text `current_row_location`, which represents the memory address or location that the code snippet points to.

`current_row_location`
