

doris::vectorized::  
VResultFileSink::prepare

doris::vectorized::  
VResultSink::prepare

create\_sender

```
graph LR; A[doris::vectorized::VResultFileSink::prepare] --> C[create_sender]; B[doris::vectorized::VResultSink::prepare] --> C;
```

The diagram illustrates a flow where two different prepare methods from the doris::vectorized namespace point to a common create\_sender function. The top box represents VResultFileSink::prepare, and the bottom box represents VResultSink::prepare. Both have blue arrows pointing to a gray box labeled create\_sender.
