

doris::vectorized::
FunctionIn::prepare

doris::vectorized::
Random::prepare

get_num_args

```
graph LR; A[doris::vectorized::FunctionIn::prepare] --> C[get_num_args]; B[doris::vectorized::Random::prepare] --> C;
```

The diagram illustrates a call graph where two different functions, `doris::vectorized::FunctionIn::prepare` and `doris::vectorized::Random::prepare`, both call the `get_num_args` function. The source functions are in white boxes, and the target function is in a gray box. Blue arrows indicate the direction of the calls.
