VResultFileSink::prepare

doris::vectorized::
VResultSink::prepare

query_timeout

```
graph LR; A["doris::vectorized::VResultFileSink::prepare"] --> C["query_timeout"]; B["doris::vectorized::VResultSink::prepare"] --> C;
```

The diagram illustrates a dependency or configuration relationship. Two function calls, 'doris::vectorized::VResultFileSink::prepare' and 'doris::vectorized::VResultSink::prepare', are shown in white boxes on the left. Blue arrows point from each of these boxes to a gray box on the right labeled 'query_timeout', indicating that both functions are associated with or depend on this timeout parameter.
