

doris::vectorized::
ColumnChunkReader::get
_def_levels

doris::vectorized::
ColumnChunkReader::get
_rep_levels

get_levels

```
graph LR; A["doris::vectorized::  
ColumnChunkReader::get  
_def_levels"] --> C["get_levels"]; B["doris::vectorized::  
ColumnChunkReader::get  
_rep_levels"] --> C;
```

The diagram illustrates a mapping from two specific method calls to a common function. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'doris::vectorized::ColumnChunkReader::get_def_levels' and the bottom box contains 'doris::vectorized::ColumnChunkReader::get_rep_levels'. On the right, there is a smaller, gray rectangular box with a black border containing the text 'get_levels'. Two blue arrows originate from the right side of the top and bottom white boxes and point towards the left side of the gray box, indicating that both methods call the 'get_levels' function.
