

doris::vectorized::
VExchangeNode::prepare

doris::vectorized::
VSortNode::prepare

prepare

```
graph LR; A["doris::vectorized::VExchangeNode::prepare"] --> C["prepare"]; B["doris::vectorized::VSortNode::prepare"] --> C;
```

The diagram illustrates a dependency or inheritance relationship. Two source nodes on the left, 'doris::vectorized::VExchangeNode::prepare' and 'doris::vectorized::VSortNode::prepare', both have arrows pointing to a single target node on the right labeled 'prepare'. The source nodes are white with black borders, while the target node is gray with a black border.
