insert_indices_from

```
graph LR; A[doris::vectorized::ColumnNullable::insert_indices_from] --> C[insert_indices_from]; B[doris::vectorized::ColumnObject::insert_indices_from] --> C;
```

The diagram illustrates a common function call. Two source functions, `doris::vectorized::ColumnNullable::insert_indices_from` and `doris::vectorized::ColumnObject::insert_indices_from`, are shown in white boxes on the left. Blue arrows point from each of these boxes to a single gray box on the right labeled `insert_indices_from`, indicating that both source functions call this common target function.
