

GetByteIndexAndAdvance

PutAligned

GetNextBytePtr

```
graph LR; A[GetByteIndexAndAdvance] --> C[GetNextBytePtr]; B[PutAligned] --> C;
```

The diagram illustrates a flow or dependency where two separate operations, 'GetByteIndexAndAdvance' and 'PutAligned', both lead to a common operation, 'GetNextBytePtr'. The first operation is positioned higher and further to the left, while the second is lower and closer to the center. Both have blue arrows pointing towards the right, where the third operation is located.
