

doris::vectorized::
AggregationNode::init

doris::vectorized::
VAnalyticEvalNode::init

create

```
graph LR; A["doris::vectorized::  
AggregationNode::init"] --> C["create"]; B["doris::vectorized::  
VAnalyticEvalNode::init"] --> C;
```

The diagram illustrates a dependency or call relationship. Two white rectangular boxes on the left contain the names of initialization functions: 'doris::vectorized::AggregationNode::init' (top) and 'doris::vectorized::VAnalyticEvalNode::init' (bottom). Two blue arrows originate from the right side of these boxes and point towards a single gray rectangular box on the right labeled 'create'.
