

doris::CommonFindOp  
::insert\_batch

doris::CommonFindOp  
::insert\_single

add\_element

```
graph LR; A[doris::CommonFindOp::insert_batch] --> C[add_element]; B[doris::CommonFindOp::insert_single] --> C;
```

The diagram illustrates a dependency or call relationship. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'doris::CommonFindOp::insert\_batch' and the bottom box contains 'doris::CommonFindOp::insert\_single'. On the right, there is a gray rectangular box with a black border containing the text 'add\_element'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'insert\_batch' and 'insert\_single' functions call or depend on the 'add\_element' function.
