TypedZoneMapIndexWriter
::finish

add

```
graph LR; A["doris::segment_v2::NGramBloomFilterIndexWriterImpl::finish"] --> C["add"]; B["doris::segment_v2::TypedZoneMapIndexWriter::finish"] --> C;
```

The diagram illustrates a control flow where two different writer classes, `NGramBloomFilterIndexWriterImpl` and `TypedZoneMapIndexWriter`, both call a common `add` function. The first box represents the `finish` method of the first writer, and the second box represents the `finish` method of the second writer. Both have blue arrows pointing to a gray box labeled `add`.
