

`_execute_with_serialized
_key_helper`

`_merge_with_serialized
_key_helper`

`_emplace_into_hash
_table`

```
graph LR; A["_execute_with_serialized  
_key_helper"] --> C["_emplace_into_hash  
_table"]; B["_merge_with_serialized  
_key_helper"] --> C;
```

The diagram illustrates a flow where two functions, `_execute_with_serialized_key_helper` and `_merge_with_serialized_key_helper`, both point to a single function, `_emplace_into_hash_table`. The first two functions are in white boxes, and the target function is in a gray box. Blue arrows indicate the direction of the flow from left to right.
