

doris::vectorized::  
ColumnConst::filter

doris::vectorized::  
IColumnDummy::filter

count\_bytes\_in\_filter

```
graph LR; A[doris::vectorized::ColumnConst::filter] --> C[count_bytes_in_filter]; B[doris::vectorized::IColumnDummy::filter] --> C;
```

The diagram illustrates a dependency or inheritance relationship. Two source functions, 'doris::vectorized::ColumnConst::filter' and 'doris::vectorized::IColumnDummy::filter', are shown in white boxes on the left. Blue arrows point from each of these boxes to a single target function, 'count\_bytes\_in\_filter', which is shown in a gray box on the right.
