

split\_string\_to\_map

```
graph LR; A[split_string_to_map] --> B[doris::Status::OK]; B --> C[doris::Status::Status];
```

A flow diagram illustrating the return type of the `split_string_to_map` function. It consists of three rectangular boxes connected by blue arrows pointing from left to right. The first box, labeled `split_string_to_map`, has a gray background. The second box, labeled `doris::Status::OK`, has a white background. The third box, labeled `doris::Status::Status`, also has a white background.

doris::Status::OK

doris::Status::Status
