

/Users/dabowang/doris
/be/src/pipeline/exec
/streaming_aggregation
_source_operator.h

```
graph BT; A["/Users/dabowang/doris<br>/be/src/pipeline/exec<br>/streaming_aggregation<br>_source_operator.cpp"] --> C["/Users/dabowang/doris<br>/be/src/pipeline/exec<br>/streaming_aggregation<br>_source_operator.h"]; B["/Users/dabowang/doris<br>/be/src/pipeline/pipeline<br>_fragment_context.cpp"] --> C;
```

The diagram illustrates a dependency relationship between three files in the Doris source code. At the top is a header file, `_source_operator.h`, which is shaded gray. Below it are two source files: `_source_operator.cpp` on the left and `_fragment_context.cpp` on the right. Both source files have blue arrows pointing upwards to the header file, indicating that they include or depend on the header file.
