

doris::vectorized::
FromDays::execute_straight

doris::vectorized::
MakeDateImpl::executeImpl

from_datetime_val

```
graph LR; A["doris::vectorized::  
FromDays::execute_straight"] --> C["from_datetime_val"]; B["doris::vectorized::  
MakeDateImpl::executeImpl"] --> C;
```

The diagram illustrates a mapping or transformation process. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'doris::vectorized::FromDays::execute_straight' and the bottom box contains 'doris::vectorized::MakeDateImpl::executeImpl'. On the right, there is a single gray rectangular box with the text 'from_datetime_val'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both source functions or methods contribute to or transform into the target 'from_datetime_val'.
