UnixTimeStampDateImpl
::execute_impl

doris::vectorized::
UnixTimeStampStrImpl
::execute_impl

trim_timestamp

```
graph LR; A[doris::vectorized::UnixTimeStampDateImpl::execute_impl] --> C[trim_timestamp]; B[doris::vectorized::UnixTimeStampStrImpl::execute_impl] --> C;
```

The diagram illustrates a common target for two different function calls. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'doris::vectorized::UnixTimeStampDateImpl::execute_impl' and the bottom box contains 'doris::vectorized::UnixTimeStampStrImpl::execute_impl'. Blue arrows point from the right side of each of these boxes to a single gray rectangular box on the right, which contains the text 'trim_timestamp'.
