_v2/ngram_bloom_filter.h

```
graph BT; A["/Users/dabowang/be_all/olap/rowset/segment_v2/bloom_filter.cpp"] --> C["/Users/dabowang/be_all/olap/rowset/segment_v2/ngram_bloom_filter.h"]; B["/Users/dabowang/be_all/olap/rowset/segment_v2/ngram_bloom_filter.cpp"] --> C;
```

The diagram illustrates a header file dependency. At the top, a grey box contains the header file path: `/Users/dabowang/be_all/olap/rowset/segment_v2/ngram_bloom_filter.h`. Below it, two white boxes represent source files. The left box contains `/Users/dabowang/be_all/olap/rowset/segment_v2/bloom_filter.cpp` and the right box contains `/Users/dabowang/be_all/olap/rowset/segment_v2/ngram_bloom_filter.cpp`. Two blue arrows point from the bottom of each source file box to the bottom of the header file box, indicating that both source files include or depend on this header.
