

get\_varint32

```
graph LR; A[get_varint32] --> B[decode_varint32_ptr]; B --> C[decode_varint32_ptr_fallback];
```

The diagram illustrates a three-step process flow. It begins with a gray rectangular box labeled 'get\_varint32'. A blue arrow points from this box to a white rectangular box labeled 'decode\_varint32\_ptr'. A second blue arrow points from the 'decode\_varint32\_ptr' box to a larger white rectangular box labeled 'decode\_varint32\_ptr\_fallback'.
