_resource

doris::vectorized::
VSortNode::release_resource

close

```
graph LR; A["doris::vectorized::VExchangeNode::release_resource"] --> C["close"]; B["doris::vectorized::VSortNode::release_resource"] --> C;
```

The diagram illustrates a flow where two different release methods from the doris::vectorized namespace converge on a single 'close' operation. The top box represents the release method for VExchangeNode, and the bottom box represents the release method for VSortNode. Both have blue arrows pointing to a gray box labeled 'close'.
