doris::vectorized::
MultiplyImpl::apply

doris::vectorized::
convert_decimals

mul_overflow

```
graph LR; A[doris::vectorized::DecimalComparison::apply] --> D[mul_overflow]; B[doris::vectorized::MultiplyImpl::apply] --> D; C[doris::vectorized::convert_decimals] --> D;
```

The diagram illustrates a dependency or call relationship. Three source functions, each in a white box with a black border, are positioned on the left. Blue arrows point from each of these source functions to a single target function, 'mul_overflow', which is in a gray box with a black border on the right. The source functions are 'doris::vectorized::DecimalComparison::apply', 'doris::vectorized::MultiplyImpl::apply', and 'doris::vectorized::convert_decimals'.
